OVERVIEW

SPECIALIST FILMS

Different types of Specialist film have different applications depending on their quality. Emperial is manufacturing various types of Specialty Films.

- | Colored stretch films
- | Pre stretch films
- | Agriculture films
- | Oxo Biodegradable films
- | Food wrap
- | Easy tear films
- | Printed films
- | Coreless films

Technical Specifications

Grade	Micron (μ)	Width (mm)	Net Weight (kg)	Stretchability (%)	Roll Length (meter)	Core ID (mm)
Hand	23	500	4.5	70%-150%	425	76
Hand	23	450	4.5	70%-150%	470	76
Hand	51	500	4.5	50%	190	76
Machine	29	500	15	300%	1120	76
Machine	51	500	15	200%	635	76
Machine	21	500	15	200%	1550	76
Machine	18	500	15	200%	1800	76
Machine	12	500	15	120%	2700	76
Machine	29	500	15	250%	1120	76

Specification will be customized as per requirement.

“ SAFETY IS A CHOICE
YOU MAKE ”

www.emperialfilms.com

Emperial Stretch LLP is a part of Emperial Films LLP and deals in various types of LLDPE Stretch Films. We not only wrap the film to your product but also save the product from damaging.

The firm is having art of manufacturing unit with unique features for producing a wide range of Stretch films from 6μ to 55μ with a guaranteed stretch of up to 330%.

We have installed COLINES Cast Line - which is the most advanced Co-Extrusion multilayer Line equipped with all latest European Technology. The Cast production technology, which guarantees extraordinary impact resistance and optimal load containment.

We do not simply sale the high quality standard films but also assist the customer to choose the most suitable packaging solution.

Our Cast Film Line is being engineered to allow production of thinner films at higher than ever winding speed. Future trend is very likely that customers will prefer multilayer film rather than mono layer

STANDARD STRETCH FILMS

Standard stretch films are designed for wrapping the product manually (with hands). Emperial is manufacturing standard films with the following grades.

www.emperialfilms.com

Product Code

- | ESL70 - Basic 70%
- | ESL100 - Medium 100%
- | ESL150 - Standard 150%

HIGH PERFORMANCE FILMS

High Performance films are categorically formulated for wrapping the product through machines. Emperial is manufacturing High performance films with the following grades.

Product Code

- | ESL200 - Power 200%
- | ESL250 - Intense 250%
- | ESL300 - Extreme 300%
- | ESL300 - Super Extreme 330%

COMPANY BRIEF

Emperial Films LLP is part of "ROYAL GROUP OF COMPANIES" which deals in plastic industries as major along with several other industries in multiple niches. The Royal Group is having an experience of more than 20 years in the industry for manufacturing, supplying and exporting of various plastic packing product and polymer related products.

Emperial Films entered into Flexible Packaging world as a manufacturer of CPP film products in the year 2017. Our company is based on the grounds of moral values, principles and ethics.

The firm is having state of art manufacturing unit with unique features for producing a wide range of CPP films starting from 15 microns to 300 microns in all three types of products. We are having the best team of experts associated with us to take care of the production process and to maintain the Industry standards.

Our manufacturing unit is equipped with Industry's most technologically advanced co-extrusion CPP line of COLINES (Italy), BOBST K-series (UK) Metallizer and Slitting Machine of ATLAS (UK).

The team of Emperial Films LLP strongly believes in establishing a strong mutual relationship with clients. If you choose us for your CPP films requirement we assure to deliver you absolute satisfaction.

VISION:

We want to establish us in the Industry as the NO 1 choice for CPP Film Products for both Domestic and International market.

MISSION:

We are working with complete dedication to create value in true sense for the stakeholders who trusted us and to make constant delivery of profitable value with satisfaction maximization for our esteemed clients.

TRANSPARENT CPP FILMS

Transparent CPP films are basically transparent cast polypropylene films. These films are specially designed for offering excellent performance with great appearance and easy conversion to do flexible packaging.

APPLICATIONS:

Bakery & Bread Products, Noodles, Fresh foods, Spices, Pouch & Bag, File & Folder, Oil and Lube, Textile etc.

WHITE OPAQUE CPP FILMS

White Opaque CPP Films are categorically formulated to deliver excellent opacity, strength, stiffness along with outstanding heat sealing feature.

Use of White Opaque CPP films is done as lamination substrates for packs used for snack food, baby diaper packs, and packs for dry food like biscuits, detergent & for several other materials for packaging.

APPLICATIONS:

Biscuits, Dry Packet food, Paper lamination, Food Packaging, Detergent & Shampoo etc.

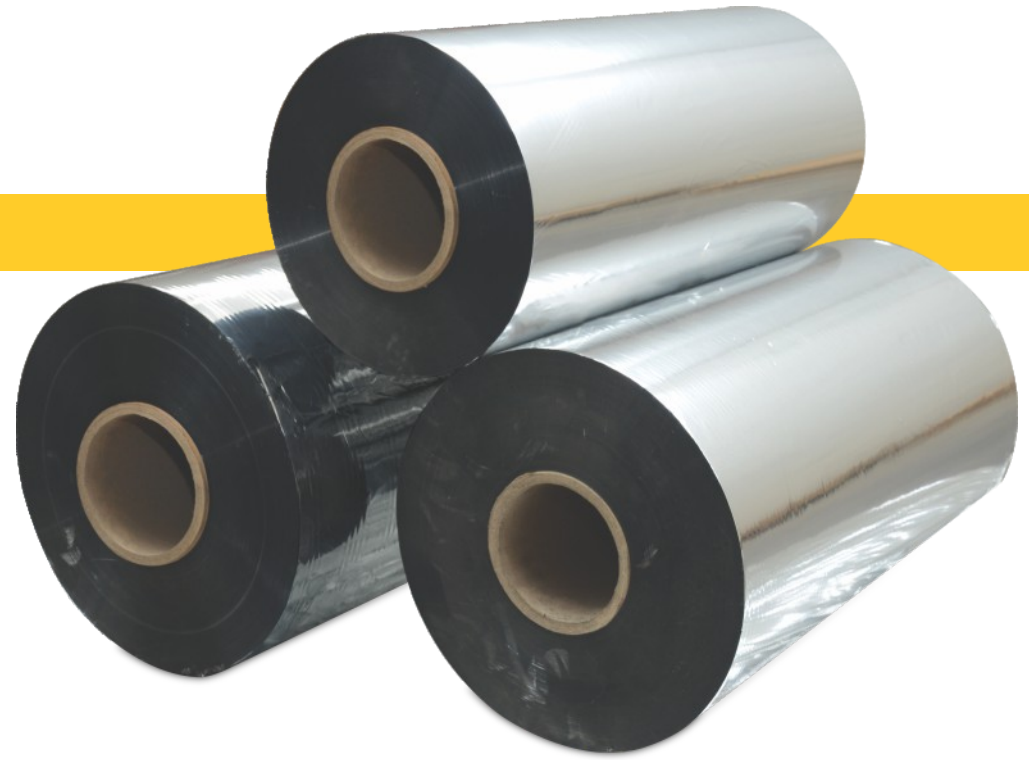

METALLIZED CPP FILMS

Film's one layer of aluminum is done on the polymer's surface. The finished CPP film will prove to be much more resistant to water as well as oxygen transmission.

Plasma and Corona treatment facility of Metallized film helps to increase the shelf life & barrier properties.

It is also providing a metallic yet glossy appearance which resembles the look of aluminum foil.

APPLICATIONS:

Food and Confectionary, Lamination, Cakes, Biscuits, Fried Food, Candies, Pasta etc.
